

New Bath Benches for Walk-In Shower Enclosures

Newer walk-in showers found in many assisted living complexes do not provide adequate seating for individuals with special seating needs.

The small built-in seat is impractical, unusable, and usually located where a proper bath chair could be placed.

Two new padded bath benches are now available to utilize this built in seat, providing a usable seating solution.

Model 7000 Padded Bath Bench

- Bath bench sits inside shower enclosure for those able to step inside.
- Suction cups hold bath bench firmly in place.
- Adjustable height legs keep the bench level.

Model 7001 Padded Bath Bench

- Bath bench extends outside of shower enclosure to assist in a sitting transfer.
- Segmented side section for shower curtain.
- Both models have a completely sealed padded vinyl seat with stainless steel hardware.
